Challenge

Due to the risk possessed from short circuits potential clients perceive high rise buildings to be traps. Inability of fire tenders to attend to buildings over 24 metres makes this a real problem, where clients want assurance to ensure adequate quality of electrical installations that can minimize short circuit risks

Evaluating the Situation

Viraj Estates a leading builder in Nashik has approached POWEReasy to install Smart DBs across their project to delivery the best and most advanced protection from electrical faults.

The Benefits

POWEReasy Smart DB has become a key differentiator and a marketable amenity for the developer to boost client confidence to purchase flats in high rise buildings. Due to the quality of amenities and the project has been 100% subscribed even before completion.

Overview

Built on the pioneering thoughts of innovation and excellence, Viraj Estates is set to recreate the luxury housing sector and commercial spaces of Nashik City.

Viraj Estates ventured in land development over three decades ago. The company was majorly into the creation of land layouts, providing plots to end-users for residential projects / Townships and commercial activities. While along the way dabbling into few stand-alone construction projects in some of the prime locations in Nashik City.

The year 1981 was when Viraj Estates first started changing the face of real estate. The first venture began from purchasing a plot and then constructing a building over it. A wise investment and well-executed construction naturally ended up being fruitful along with garnering substantial profits. This success nudged our founding directors into the real estate business. Since then the company has been flourishing in and around Nashik City with 100% devotion and perseverance.
